

# ITALY

## Translational Medicine: From Bench to Bedside to The Community

### Description

Study the latest innovations in personalized medicine that have transformed prevention, diagnosis and treatment. International experts provide examples of exciting laboratory discoveries and translate them to patient bedsides.

### Highlights

- Hands-on workshops with internationally recognized biomedical scientists
- Learn cutting-edge advances in personalized medicine, bioengineering, artificial intelligence, drug discovery and regenerative medicine
- Earn 3 credits in 1 week
- Explore Modena and Bologna, its extraordinary culinary tradition, and the Enzo Ferrari Museum
